

## MEMORANDUM

To: Jim Lehr, EPA/DOE  
 From: Susan Schrader, PRC *Susan*  
 Date: April 22, 1992  
 Re: SITE CPFM Project

I talked to Scott Cozell yesterday afternoon (April 21, 1992) about the feasibility of using the OU4 IM/TRA tanks for our influent and effluent tanks. He said that according to the engineering group it is very feasible. The plumbing for the tanks is easy to get at and put T's in where needed. He restated his concerns about any RCRA permitting problems and he said he would try and find out today who was on the RCRA permitting team. Also, there may be some difficulty driving the trailer onto the tank pad. He will check on the room available.

He also restated his concern regarding charges. Also, he wondered how the contract between PRC and EG&G would be established. He said EG&G regularly contract other firms' assistance but they had no experience, that he was aware of, being contracted by other firm (other than of course DOE). This discussion lead us to realizing that this "subcontractor procurement" could be much more difficult than I originally expected. He had the following great idea: if EG&G is currently under contract with DOE maybe we could route the field support funding through DOE then to EG&G. He said that direct requests from DOE get responded to much quicker than internal requests from EG&G. If DOE doesn't put the request for engineering (called an Engineering Job Order, EJO) than J.C. must do this as a request from an EG&G group.

So, my main questions is, can you help us figure out a way to route our field subcontractor monies to DOE then to EG&G? Our subcontractor papers should be completed in approximately 3 weeks. At this time, we need to know who to address as the subcontracted party. This has become quite complicated and I am not sure the best way to resolve it. There is a procurement division in EG&G that Scott told me about: these folks may know of a way to work within the rules and get this done fast. Also, Scott said that all of J.C.'s projects must go through Art Saunders (EG&G) to get approval: he also may know of a way to get things done.

Let me know if you need more info. Again, we are trying to blaze a path where none have gone before. Your assistance is, as always, appreciated. I'll check back with you on Monday on this issue. I'm out of the office Thursday afternoon and all day Friday.
